## ORDERING INSTRUCTIONS

1. Check the nameplate to identify the type of breaker you have.
2. Identify the part(s) from the photos shown.
3. Determine the style number for the required parts.
4. Specify the quantity required.
5. Contact your local Square D Distributor to place your order.

**POLE UNITS**

Type DS-206,  
DSL-206, DSII-308,  
DSLII-308

LATCH CHECK SWITCH	49	ALL	140D161G01	140D161G01

① Replacement shunt trip, spring release and undervoltage trip are complete assemblies and include mounting hardware and wire leads (not shown). If adding shunt trip, spring release or undervoltage trip to manual breakers; an auxiliary switch (page 14), and wiring guide kit (page 19) are required. Confirm that secondary contacts exist in the rear of the breaker. All changes or additions on the breaker should be wired per the standard drawing 44021-500 and indicate the change on the breaker nameplate.

① Replacement shunt trip, spring release and undervoltage trip are complete assemblies and include mounting hardware and wire leads (not shown). If adding shunt trip, spring release or undervoltage trip to manual breakers; an auxiliary switch (page 14), and wiring guide kit (page 19) are required. Confirm that secondary contacts exist in the rear of the breaker. All changes or additions on the breaker should be wired per the standard drawing 44021-500 and indicate the change on the breaker nameplate.

Figure 54: New Auxiliary Switch Assembly Kit (round) - one high

New Auxiliary Switch Assembly Kit (round) ① (Includes mounting bracket, switch, covers, and screw)		Style Number
1 High Assembly Kit		1A33571G01
2 High Assembly Kit		1A33571G02
Additional Auxiliary Switch Assembly with cover (rectangular) ②		
2nd Auxiliary Switch		697B536G08
3rd Auxiliary Switch		697B536G09
Replacement Auxiliary Switches Assembly (rectangular) ③ (Includes: switch, drive link and hardware)		
1st Auxiliary Switch (ABAB only)		697B536G04
2nd Auxiliary Switch		697B536G05
3rd Auxiliary Switch		697B536G06
Replacement Auxiliary Switch Only (rectangular)		
ABAB Auxiliary Switch		449D622G33
AAAA Auxiliary Switch		449D622G34
BBBB Auxiliary Switch		449D622G35
AAAB Auxiliary Switch		449D622G36
ABBB Auxiliary Switch		449D622G37
A = N.O. B= N.C.		

- ① When adding an auxiliary switch, be sure that the wiring guides are installed. There are three wiring guides and they are located as follows: one inside and one outside on the left side of the breaker, and one between the right side of the trip unit and the auxiliary switch. Refer to Figure 1 on page 1 and Figure 2 on page 1 for location and to page 19 for style numbers. Additional secondary contacts and covers may be required. Refer to Figure 3 on page 2 and page 19 for the style number.
- ② For adding to breakers with existing rectangular auxiliary switches.
- ③ Used for replacement only of existing rectangular auxiliary switches.

① Customer is to provide the following original information: GO, P.O., Item, FN and Option Numbers.

## SWITCHGEAR CELL PROVISIONS AND UPGRADES

If the original switchgear has blank compartments or if an existing breaker needs to be upgraded, cell parts can be ordered. They typically include some or all of the following parts:

- Mounting pan, extension rails, and push-to-trip mechanism
- Interference brackets
- Polyester backplate (CT mounting plate)
- Line and load stabs
- Load bus runbacks, extensions, supports, and lug adapters
- Door with handle, hinge and trip button
- Gas and arc shields
- Seismic positioner

Contact your local Square D sales representative with the following information:

- Factory Order number
- Date of manufacture

## RECOMMENDED SPARE PARTS FOR STOCK

The quantities listed are recommended for 5 breakers of the same rating. Items 8-10 are only required for electrically operated breakers. The reference page number contains the complete styles of the required parts. Where needed, fill in or complete the style numbers for your application and forward to your local Square D sales representative.
